

# SAFETY DATA SHEET

# 1. Identification

**Product identifier** SIR-CHEM® DRY POWDER BLACK

Other means of identification Not available.

Recommended use Non-destructive testing.

**Recommended restrictions** None known.

Manufacturer / Importer / Supplier / Distributor information

Circle Systems, Inc. Company name Address 1210 Osborne Road

St. Marys, GA 31558

**Telephone** 912-729-2735

E-mail customerservice@circlesafe.com

**Emergency phone number** Chem-Tel 800-255-3924 (US & Canada); +1-813-248-0585 (International)

# 2. Hazard(s) identification

Physical hazards Not classified. **Health hazards** Not classified. Combustible dust. **OSHA** defined hazards

Label elements

Hazard symbol None. Signal word Warning.

**Hazard statement** May form combustible dust concentrations in air.

**Precautionary statement** 

Prevention Keep away from heat/sparks/open flames/hot surfaces. No smoking. Keep container tightly

closed. Ground/bond container and receiving equipment. Prevent dust accumulation to

minimize explosion hazard.

Remove and wash contaminated clothing before re-use. In case of fire: Use appropriate media Response

for extinction.

Store away from incompatible materials. Storage

Dispose of contents/containers in accordance with local/regional/national/international **Disposal** 

regulations.

Hazard(s) not otherwise

classified (HNOC)

Not classified.

Supplemental information Not applicable.

## 3. Composition/information on ingredients

#### **Mixtures**

Chemical name	CAS number	%
Iron Powder	7439-89-6	> 95

## 4. First-aid measures

SIR-CHEM® DRY POWDER BLACK

Inhalation Move to fresh air. Call a physician if symptoms develop or persist.

Wash off with soap and water. Get medical attention if irritation develops and persists. Skin contact Eye contact Do not rub eyes. Rinse with water. Get medical attention if irritation develops and

persists. Ingestion

Rinse mouth. Get medical attention if symptoms occur.

DPB060123 Version #: 03 Revision date: 01-June-2023 Issue date: 19-February-2019

Most important symptoms/effects, acute and delayed

Indication of immediate medical attention and special treatment needed

Dust may cause eye, skin and respiratory tract irritation.

Provide general supportive measures and treat symptomatically.

**General information** 

Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

## 5. Fire-fighting measures

Suitable extinguishing media

Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2). Apply extinguishing media

carefully to avoid creating airborne dust.

Unsuitable extinguishing media

Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from the chemical

Explosion hazard: Avoid generating dust; fine dust dispersed in air in sufficient concentrations and in the presence of an ignition source is a potential dust explosion hazard.

Special protective equipment and precautions for firefighters

Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Fire-fighting equipment/instructions

In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk. Use water spray to cool unopened containers.

General fire hazards

Heat may cause the containers to explode. May form combustible dust concentrations in air.

# 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures Keep unnecessary personnel away. Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Use only non-sparking tools. Wear appropriate personal protective equipment. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained.

Methods and materials for containment and cleaning up

ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air).

Large Spills: Sweep or shovel up material and place in a clearly labeled container for waste. Following product recovery, flush area with water.

Small Spills: Collect dust using a vacuum cleaner equipped with HEPA filter.

Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.

**Environmental precautions** 

Avoid discharge into drains, water courses or onto the ground.

## 7. Handling and storage

Precautions for safe handling

Minimize dust generation and accumulation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Dry powders can build static electricity charges when subjected to the friction of transfer and mixing operations. Provide adequate precautions, such as electrical grounding and bonding, or inert atmospheres. Explosion proof exhaust ventilation is recommended. Wear appropriate personal protective equipment. Observe good industrial hygiene practices. Avoid prolonged exposure.

Conditions for safe storage, including any incompatibilities

SIR-CHEM® DRY POWDER BLACK

Keep containers tightly closed in a dry, cool and well-ventilated place. Store away from incompatible materials (see Section 10 of the SDS). Keep away from heat, sparks and open flame.

## 8. Exposure controls/personal protection

Biological limit values No biological exposure limits noted for the ingredient(s).

**Exposure guidelines** No exposure standards allocated.

Appropriate engineering

controls

Explosion-proof general and local exhaust ventilation. Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Individual protection measures, such as personal protective equipment

**Eye/face protection** Wear safety glasses with side shields (or goggles).

Skin protection

**Hand protection** For prolonged or repeated skin contact use suitable protective gloves.

**Other** Wear suitable protective clothing.

limits (where applicable) or to an acceptable level (in countries where exposure limits have not

been established), an approved respirator must be worn.

**Thermal hazards** Wear appropriate thermal protective clothing, when necessary.

**General hygiene** When using, do not eat, drink or smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking.

Routinely wash work clothing and protective equipment to remove contaminants.

# 9. Physical and chemical properties

**Appearance** 

Physical state Solid. Powder. **Form** Color Black. Odor Odorless Odor threshold Not available. Not available. pН Melting point/freezing point 2795 °F (1535 °C) Initial boiling point and boiling Not available.

range

Flash point Not available.

Evaporation rate Not available.

Flammability (solid, gas) Not available.

#### Upper/lower flammability or explosive limits

**Decomposition temperature** 

**Viscosity** 

Not available. Flammability limit - lower (%) Not available. Flammability limit - upper (%) Not available. Explosive limit – lower (%) Explosive limit – upper (%) Not available. Not available. Vapor pressure Not available. Vapor density 2.5 (68 °F (20 °C)) Specific gravity Insoluble in water. Solubility(ies) Partition coefficient (n-octanol/water) Not available. **Auto-ignition temperature** Not available

SIR-CHEM® DRY POWDER BLACK SDS US

Not available.

Not available.

Other information

VOC (Weight %) Not available.

10. Stability and reactivity

Reactivity The product is stable and non-reactive under normal conditions of use, storage and transport.

Chemical stability Material is stable under normal conditions.

Possibility of hazardous

reactions

No dangerous reaction known under conditions of normal use.

Conditions to avoid Keep away from heat, sparks and open flame. Minimize dust generation and accumulation.

Contact with incompatible materials.

Incompatible materials Strong oxidizing agents.

Hazardous decomposition

products

No hazardous decomposition products are known.

# 11. Toxicological information

Information on likely routes of exposure

Ingestion Expected to be a low ingestion hazard. Inhalation of dusts may cause respiratory Inhalation Skin contact irritation. Dust or powder may irritate the skin.

**Eve contact** Dust may irritate the eyes.

Symptoms related to the physical, chemical and toxicological characteristics Information on toxicological effects

Dust may cause eye, skin and respiratory tract irritation.

Acute toxicity Expected to be a low hazard for usual industrial or commercial handling by trained personnel.

Components **Species Test Results** 

Iron Powder (CAS 7439-89-6)

Acute Oral

LD50 Rat 30 g/kg

Skin corrosion/irritation Prolonged skin contact may cause temporary irritation. Serious eye damage/eye Direct contact with eyes may cause temporary irritation.

Respiratory sensitization

irritation

This product is not expected to cause skin sensitization. Skin sensitization

No data available to indicate product or any components present at greater than 0.1% Germ cell mutagenicity

are mutagenic or genotoxic.

Not a respiratory sensitizer.

Carcinogenicity This product is not considered to be a carcinogen by IARC, ACGIH, NTP, or OSHA. This

Reproductive toxicity product is not expected to cause reproductive or developmental effects.

Specific target organ toxicity -

single exposure

Specific target organ toxicity -

Not classified.

Not classified.

repeated exposure **Aspiration hazard** 

Not an aspiration hazard.

Prolonged inhalation may be harmful. Chronic effects

## 12. Ecological information

The product is not classified as environmentally hazardous. However, this does not exclude the **Ecotoxicity** 

possibility that large or frequent spills can have a harmful or damaging effect on the environment.

No data is available on the degradability of this product. Persistence and degradability

Bioaccumulative potential No data available for this product.

Mobility in soil Not available.

Other adverse effects No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation

potential, endocrine disruption, global warming potential) are expected from this component.

SIR-CHEM® DRY POWDER BLACK

## 13. Disposal considerations

**Disposal instructions** Collect and reclaim or dispose in sealed containers at licensed waste disposal site.

Waste from residues / unused

products

Dispose of contents/container in accordance with local/regional/national/international regulations. Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

# 14. Transport information

Not regulated as dangerous goods.

#### **IATA**

Not regulated as dangerous goods.

#### **IMDG**

the IBC Code

Not regulated as dangerous goods.

Transport in bulk according to Annex II of MARPOL 73/78 and Not applicable.

## 15. Regulatory information

**US federal regulations** This product is a "Hazardous Chemical" as defined by the OSHA Hazard

Communication Standard, 29 CFR 1910.1200.

All components are on the U.S. EPA TSCA Inventory List.

#### TSCA Section 12(b) Export Notification (40 CFR 707, Subpt D)

Not regulated.
